SARS-CoV-2 (COVID-19) Qualitative PCR	
SARS-CoV-2 (COVID-19) Qual PCR Result	Detected
SARS-CoV-2 (COVID-19) Qual PCR Interpretation	<p>This is a positive result, indicating the presence of the virus that causes COVID-19. Performed using the Cobas (R) SARS-CoV-2 real-time RT-PCR assay. Additional details available here: https://testguide.labmed.uw.edu/NCVQLT This test is not yet approved or cleared by the United States FDA. When there are no FDA-approved or cleared tests available, and other criteria are met, FDA can make tests available under an emergency access mechanism called an Emergency Use Authorization (EUA). The EUA for this test is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of in vitro diagnostics for the detection and/or diagnosis of the virus that causes COVID-19. This EUA will remain in effect (meaning this test can be used) for the duration of the COVID-19 declaration justifying emergency of IVDs, unless it is terminated or revoked by FDA (after which the test may no longer be used).</p>
